Plan Investment Fund, Inc.

February 27, 2019

Dear Investors:

On behalf of the Board of Trustees, I am pleased to submit the 2018 Annual Report for Plan Investment Fund, Inc. (the “Fund”).

The Fund had an extremely successful 2018 by all performance metrics. The 2a-7 funds offered real positive, after inflation, yields for the first time in over 10 years. Blue Cross and Blue Shield Plan utilization, as measured by trading volume, hit all-time highs and average assets for the calendar year exceeded \$1 billion. Investment income of \$19 million was distributed back to investors in 2018, an increase of over 250% from 2017.

Sincerely,

Susan A. Pickar
President and Chief Executive Officer

Past Performance Does Not Guarantee Future Results. The Portfolios may experience negative performance.

Government Portfolio: *You could lose money by investing in the Portfolio. Although the Portfolio seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Portfolio is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund’s sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.*

Money Market Portfolio: *You could lose money by investing in the Portfolio. Because the share price of the Portfolio will fluctuate, when you sell your shares they may be worth more or less than what you originally paid for them. The Portfolio may impose a fee upon sale of your shares or may temporarily suspend your ability to sell shares if the Portfolio’s liquidity falls below required minimums because of market conditions or other factors. An investment in the Portfolio is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund’s sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.*

The report is submitted for the general information of the shareholders of the Fund. It is not authorized for distribution to prospective investors unless preceded or accompanied by an effective prospectus, which includes information regarding the Fund’s risks, objectives, fees and expenses, experience of its management and other information.

(1) Interest Rate disclosed represents the discount rate at the time of purchase.

(2) Variable rate security. The rate shown is the rate in effect at December 31, 2018. The rate floats based upon the published reference rate and spread disclosed in the Portfolio of Investments.

(3) Security exempt from registration under Rule 144A or Section 4(2) of the Securities Act of 1933, as amended. These securities may only be resold in transactions exempt from registration, normally to qualified institutional buyers. Securities have been deemed to be liquid based on procedures performed by BlackRock Advisors, LLC, the investment advisor to the Money Market Portfolio.

⁽²⁾ Without the waiver and/or reimbursement of a portion of advisory and administration fees (see Note 4), the ratio of total expenses to average net assets would have been 0.36%, 0.57%, 0.33%, 0.31% and 0.27% for the years ended December 31, 2018, 2017, 2016, 2015 and 2014, respectively.

⁽³⁾ Without the waiver and/or reimbursement of a portion of advisory and administration fees (see Note 4), the ratio of net investment income/(loss) to average net assets would have been 1.75%, 0.49%, 0.14%, (0.08)% and (0.09)% for the years ended December 31, 2018, 2017, 2016, 2015 and 2014, respectively.

See accompanying notes to financial statements.

Plan Investment Fund, Inc.
Notes to Financial Statements
December 31, 2018

Note 1. Organization

Plan Investment Fund, Inc. (the “Fund”) is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as an open-end management investment company and is organized as a Maryland Corporation governed by a Board of Trustees (the “Board of Trustees” or the “Board”). The Fund consists of two portfolios: the Government Portfolio and the Money Market Portfolio (each, a “Portfolio” and collectively, the “Portfolios”). The assets and liabilities of each Portfolio are segregated and a shareholder’s interest is limited to the Portfolio in which Participation Certificates (“PCs”) are held.

Government Portfolio — a government money market fund which seeks a high level of current income and stability of principal by investing in U.S. Government obligations and repurchase agreements relating to such obligations.

Money Market Portfolio — an institutional prime money market fund which seeks a high level of current income and stability of principal by investing in U.S. Government obligations, bank and commercial obligations and repurchase agreements relating to such obligations.

Indemnification

In the normal course of business, the Fund may enter into contracts under which it has general indemnification obligations. The Fund’s maximum exposure under these arrangements is dependent on claims that may be made against the Fund in the future, and therefore, cannot be estimated; however, based on experience, the risk of material loss from such claims is considered remote.

Note 2. Significant Accounting Policies

The Fund follows accounting and reporting guidance in accordance with the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 946, Financial Services – Investment Companies. The Fund’s financial statements are prepared in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”). The following is a summary of significant accounting policies followed by the Fund.

Portfolio Classification and Valuation: On July 23, 2014, the SEC voted to amend the rules under the 1940 Act which govern the operations of money market mutual funds, including the Government Portfolio and the Money Market Portfolio. The amended rules effectively created three categories of money market funds: Government, Retail and Institutional. Under the amended rules, Government and Retail money market funds may continue to seek to transact at a stable \$1.00 net asset value (“NAV”) per share and use amortized cost to value their portfolio holdings, subject to certain conditions. Institutional money market funds are required to “float” their NAV per share by pricing their shares to four decimal places (e.g., \$1.0000) and valuing their portfolio securities using fair value rather than amortized cost (except where otherwise permitted under Securities and Exchange Commission (“SEC”) rules). In addition, pursuant to the amended rules, the Money Market Portfolio has adopted policies and procedures for the imposition of liquidity fees or redemption gates under certain conditions.

The Government Portfolio operates as a Government money market fund and accordingly: (1) invests at least 99.5% of its total assets in: (i) cash; (ii) securities or instruments issued or guaranteed as to principal and interest by the United States or certain U.S. Government agencies or instrumentalities; and/or (iii) repurchase agreements that are collateralized fully by U.S. Government obligations or cash; (2) uses amortized cost, which approximates fair value, to value its portfolio securities and seeks to transact at a stable \$1.00 NAV per PC; and (3) has elected not to provide for the imposition of liquidity fees and redemption gates at this time as permitted under the amended rules.

The Money Market Portfolio operates as an institutional money market fund and accordingly: (1) is limited to institutional investors; (2) utilizes market-based prices to value its portfolio holdings, except to the extent that market information is not readily available or deemed by the investment advisor to be unreliable. In which case, the portfolio holding is valued pursuant to procedures approved by the Board; (3) as of October 11, 2016, transacts at a floating NAV per PC that uses four decimal place precision (e.g., \$1.0000) (except that the Portfolio may use amortized cost to value short-term investments with remaining maturities of 60 days or less, subject to the investment advisor’s determination that such valuations represent the securities’ fair value which is further subject to Board oversight); and (4) has adopted policies and procedures to impose

Plan Investment Fund, Inc.
Notes to Financial Statements
December 31, 2018
(Continued)

liquidity fees of up to 2% of the value of the PC's redeemed and/or temporarily suspend redemptions in the event that the Portfolio's weekly liquid assets were to fall below designated thresholds, subject to the Board's, including a majority of the Independent Trustees, determination that such action is in the best interest of the Portfolio. The Money Market Portfolio calculates its NAV three times daily, at 8:00 a.m., 12:00 p.m. and 3:00 p.m. Eastern time on each Business Day.

Investments in other open-end management investment companies, if held, are valued based on the NAV of the management investment companies (which are to be determined pursuant to procedures discussed in their prospectuses). If price quotes are unavailable or deemed unreliable, securities will be fair valued in accordance with procedures adopted by the Board.

Securities Transactions and Investment Income: For financial reporting purposes, investment transactions are recorded on the trade date. Realized gains and losses on investments sold are recorded on the identified cost basis. Gains and losses on principal paydowns from mortgage-backed securities are recorded as interest income on the Statements of Operations. Interest income is recorded on an accrual basis. Market discounts and premiums on securities purchased are amortized on an effective yield basis over the estimated lives of the respective securities for the Portfolios.

Dividends and Distributions to Participation Certificate Holders: Dividends from net investment income of the Portfolios are declared daily and paid monthly. The Government Portfolio and the Money Market Portfolio intend, subject to the use of offsetting capital loss carryforwards, to distribute net realized short and long-term capital gains, if any, throughout each year. Income dividends and capital gain distributions are determined in accordance with U.S. federal income tax regulations, which may differ from U.S. GAAP. Permanent book and tax basis differences relating to shareholder distributions will result in reclassifications within the components of net assets.

Federal Income Taxes: No provision is made for federal income taxes as it is each Portfolio's intention to continue to qualify as a regulated investment company by complying with the requirements of Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), and to distribute substantially all of its net investment income to Participation Certificate holders, which will be sufficient to relieve each Portfolio from all, or substantially all, federal income and excise taxes.

The Fund's policy is to classify interest and penalties associated with underpayment of federal and state income taxes, if any, as income tax expense on its Statement of Operations. As of December 31, 2018, the Fund did not have any interest or penalties associated with the underpayment of any income taxes.

Repurchase Agreements: Each Portfolio may enter into repurchase agreements under the terms of a Master Repurchase Agreement with financial institutions such as banks and broker-dealers, subject to the seller's agreement to repurchase the subject security at an agreed upon date and price. The repurchase price generally equals the price paid by the Portfolio plus interest negotiated on the basis of current short-term rates. Collateral for repurchase agreements may have longer maturities than the maximum permissible remaining maturity of Portfolio investments. The repurchase agreement is conditioned upon the collateral being deposited under the Federal Reserve book entry system or held in a separate account by the Fund's custodian, sub-custodian or an authorized securities depository. The collateral consists of U.S. Government and U.S. Government agency securities, the market value of which, on a daily basis, must be maintained at an amount equal to at least 100% of the repurchase price of the securities subject to the repurchase agreement plus accrued interest. Upon an event of default under the terms of the Master Repurchase Agreement, both parties have the right to set-off. If the seller defaults or enters into an insolvency proceeding, liquidation of the collateral by the purchaser may be delayed or limited. As of December 31, 2018, the Government Portfolio and the Money Market Portfolio held repurchase agreements, which are included under "Repurchase Agreements, at cost, which approximates fair value" in the Statements of Assets and Liabilities. The value of the related collateral that the Portfolios hold for each of their repurchase agreements is disclosed in the Schedules of Investments for the Portfolio and exceeded the value of the corresponding repurchase agreement at December 31, 2018.

Expenses: Expenses are recorded on an accrual basis. Each Portfolio pays the expenses that are directly related to its operations, such as investment advisory and servicing fees, custodian fees, and transfer agent fees. Expenses incurred by the Fund on behalf of each Portfolio, such as trustee expenses or legal fees, are allocated among each of the Portfolios either proportionately based upon the Portfolios' relative net assets or using another reasonable basis such as equally across each Portfolio, depending on the nature of the expense.

Plan Investment Fund, Inc.
Notes to Financial Statements
December 31, 2018
(Continued)

Management Estimates: The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the financial statements, and that affect the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Note 3. Fair Value Measurement

Fair Value Measurement: The inputs and valuation techniques used to measure fair value of the Portfolios' investments are categorized into three levels as described in the hierarchy below:

- Level 1 – quoted prices in active markets for identical securities
- Level 2 – other significant observable inputs (including amortized cost, quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 – significant unobservable inputs (including the Portfolio's own assumptions in determining the fair value of investments)

Fixed-income securities held within the Money Market Portfolio are valued at fair value (Valuation Approach) using price evaluations provided by an independent pricing service which may use the following inputs/techniques: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, benchmark securities, bids and offers, and reference data, including market research publications. Securities held within the Government Portfolio are generally valued at amortized cost (Cost Approach), which approximates fair value, in accordance with Rule 2a-7 under the 1940 Act. Generally, amortized cost approximates the current fair value of a security, but since the value is not obtained from a quoted price in an active market, such securities are reflected as Level 2.

At the end of each calendar quarter, management evaluates the Levels 1, 2 and 3 investment holdings in each Portfolio. Various factors are considered in classifying Portfolios' holdings, such as: changes in market activity from the prior reporting period, whether or not a broker is willing to execute at the quoted price and the depth and consistency of prices from third party services. As of December 31, 2018, the hierarchical input levels of each Portfolio's investment holdings, by type of security or financial instrument, is set forth in the table below. For the year ended December 31, 2018, there were no transfers to or from Level 3 for the Portfolios and at December 31, 2018, none of the Portfolios' investments holdings were classified as Level 3.

	Total Fair Value at December 31, 2018	Level 1 Quoted Price	Level 2 Significant Observable Inputs	Level 3 Significant Unobservable Inputs
Government Portfolio				
U.S. Treasury Obligations	\$167,520,524	\$—	\$167,520,524	\$—
Agency Obligations	303,302,925	—	303,302,925	—
Repurchase Agreements	280,000,000	—	280,000,000	—
	<u>\$750,823,449</u>	<u>\$—</u>	<u>\$750,823,449</u>	<u>\$—</u>
Money Market Portfolio				
U.S. Treasury Obligations	\$48,965,060	\$—	\$48,965,060	\$—
Bank Obligations	51,335,951	—	51,335,951	—
Corporate Debt	105,799,847	—	105,799,847	—
Non-US Sub-Sovereign	9,486,357	—	9,486,357	—
Time Deposits	16,100,000	—	16,100,000	—
Repurchase Agreements	36,000,000	—	36,000,000	—
	<u>\$267,687,215</u>	<u>\$—</u>	<u>\$267,687,215</u>	<u>\$—</u>

Plan Investment Fund, Inc.
Notes to Financial Statements
December 31, 2018
(Continued)

Due to the inherent uncertainty in determining the fair value of investments that do not have a readily available market quotation, the fair value of the Portfolios' investments may fluctuate from period to period. Additionally, the fair value of investments may differ significantly from the values that would have been used had a readily available market existed for such investments and may differ materially from the values the Portfolios' may ultimately realize. Further, such investments may be subject to legal and other restrictions on resale or otherwise may be less liquid than publicly traded securities.

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

Note 4. Transactions with Affiliates and Related Parties and Other Fee Arrangements

The Fund has entered into agreements for investment advisory and service agent, distribution, administrative, custodian and transfer agent services, and certain other management services, as follows:

BCS Financial Services Corporation (the "Administrator"), serves as the Fund's Administrator with respect to the Fund's overall operations and relations with holders of PCs. Certain officers or employees of the Administrator are also Officers of the Fund. All Fund Officers serve without compensation from the Fund. As compensation for its services, each Portfolio pays the Administrator a fee, computed daily and paid monthly, at an annual rate not to exceed 0.05% of the average daily net assets of each of the Fund's Portfolios.

BlackRock Advisors, LLC ("BALLC"), a wholly-owned indirect subsidiary of BlackRock, Inc., serves as the Portfolios' investment advisor and service agent. As servicing agent, BALLC maintains the financial accounts and records, and computes the NAV and net income for both Portfolios. BALLC subcontracts certain administrative services to BNY Mellon Investment Servicing (U.S.), Inc. ("BNY Mellon Investment Servicing"). As compensation for its services, the Government Portfolio and the Money Market Portfolio each pay BALLC a fee, computed daily and paid monthly based upon the following annualized percentages of the average daily net assets of the Portfolio: 0.20% of the first \$250 million, 0.15% of the next \$250 million, 0.12% of the next \$250 million, 0.10% of the next \$250 million, and 0.08% of amounts in excess of \$1 billion.

BALLC has agreed to reduce the fees otherwise payable to it to the extent necessary to reduce the ordinary operating expenses of the Government Portfolio and Money Market Portfolio so that they individually do not exceed 0.30% of each Portfolio's average daily net assets for the year. In addition, (i) BALLC and the Administrator have agreed to waive fees such that the Government Portfolio's ordinary operating expenses do not exceed 0.10% of the Portfolio's average daily net assets; (ii) BALLC has agreed to waive fees to cap the total expenses of the Money Market Portfolio at 0.175% of the average daily net assets up to \$1 billion, 0.16% of the average daily net assets between \$1 billion and \$2 billion, and 0.155% of the average daily net assets above \$2 billion; and (iii) the Administrator has agreed to waive one basis point of its contractual fees relating to the Money Market Portfolio (collectively, "other fee waivers").

For the Government Portfolio and the Money Market Portfolio, the Administrator has further agreed that if for any day, after giving effect to all expenses and other fee waivers, including without limitation any extraordinary expenses, the "portfolio yield" would be less than 0.01%, the Administrator shall waive that portion of its fees or all fees for such day so that after giving effect to such waiver and the other fee waivers, either the portfolio yield for such day would be not less than 0.01% or the Administrator would have waived all of its fees for such day. BALLC has further agreed that if for any day, after giving effect to any other fee waivers and the Administrator fee waiver, the portfolio yield would be less than 0.01%, BALLC shall waive that portion of its fees or all fees for such day so that after giving effect to such waiver, the other fee waivers and the Administrator fee waiver, either the portfolio yield for such day would be not less than 0.01% or BALLC would have waived all of its fees for such day. The Administrator and BALLC cannot terminate any of the fee waivers disclosed herein prior to May 1, 2019 without the consent of the Board. BALLC and the Administrator will not recoup from the Portfolios any previously waived fees or reimbursed expenses in any subsequent years.

Effective May 1, 2017, BALLC and the Administrator entered into an agreement which guarantees BALLC a minimum annual fee. Neither the Fund nor the Portfolios are a party to, or financially responsible for, this minimum fee agreement.

Plan Investment Fund, Inc.
Notes to Financial Statements
December 31, 2018
(Continued)

As a result of the foregoing waivers, for the year ended December 31, 2018, the Administrator waived \$289,539 and \$20,470 which the Administrator was otherwise entitled to as the fees for its services as Administrator for the Government Portfolio and the Money Market Portfolio, respectively. BALLC waived \$920,526 and \$265,631 of its investment advisory fees for the Government Portfolio and the Money Market Portfolio, respectively, for the year ended December 31, 2018.

The Bank of New York Mellon (the “Custodian”) acts as custodian of the Fund’s assets and BNY Mellon Investment Servicing (US) Inc. (previously defined as “BNY Mellon Investment Servicing”) acts as the Fund’s accounting agent, transfer agent and dividend disbursing agent. Both the Custodian and BNY Mellon Investment Servicing are wholly-owned subsidiaries of The Bank of New York Mellon Corporation. The Custodian and BNY Mellon Investment Servicing earn fees from the Portfolios for serving in these capacities.

Foreside Fund Services, LLC (the “Distributor”) is the Fund’s distributor. The Distributor is neither affiliated with the Administrator, BALLC, The Bank of New York Mellon Corporation nor their affiliated companies. The Fund does not have a distribution plan (under Rule 12b-1 of the 1940 Act); accordingly, the Distributor receives no compensation from the Fund for its distribution services.

Pursuant to a Chief Compliance Officer Agreement with the Fund, Foreside Fund Officer Services, LLC (“FFOS”), an affiliate of the Distributor, provides a Chief Compliance Officer to the Fund as well as compliance support functions. FFOS is paid a fee for the services provided, which is paid monthly in arrears.

Pursuant to a Fund Chief Financial Officer/Treasurer Agreement with the Fund, Foreside Management Services, LLC (“FMS”), an affiliate of the Distributor and FFOS, provides Fund Treasurer and Principal Financial Officer Services to the Fund. FMS is paid an annual fee plus out of pocket expenses for these services, which are paid by the Administrator.

Note 5. Tax Information

The Portfolios have followed the authoritative guidance on accounting for and disclosure of uncertainty in tax positions, which requires the Portfolios to determine whether a tax position is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. The Portfolios have determined that there was no effect on the financial statements from following this authoritative guidance. In the normal course of business, the Portfolios’ tax returns are subject to examination by federal, state and local jurisdictions, where applicable, for the last three years.

The tax character of distributions paid by the Portfolios during the years ended December 31, 2018 and 2017 were as follows:

	<u>Ordinary Income Dividend</u>	<u>Long-Term Capital Gains</u>
Government Portfolio		
2018	\$ 15,976,322	\$—
2017	4,273,093	—
Money Market Portfolio		
2018	\$ 3,018,425	\$—
2017	278,614	—

As of December 31, 2018, the components of distributable earnings on a tax basis were as follows:

Portfolio	<u>Undistributed Ordinary Income</u>	<u>Capital Loss Carryforwards</u>	<u>Unrealized Appreciation (Depreciation)</u>	<u>Total Distributable Earnings</u>
Government Portfolio	\$10,555	\$ —	\$ —	\$10,555
Money Market Portfolio	1,944	(1,719)	(4,710)	(4,485)

As of December 31, 2018, the Money Market Portfolio had \$1,719 of capital loss carryforwards, which are short-term capital losses and have an unlimited period of capital loss carryforward. The Government Portfolio had no capital loss carryforwards.

Plan Investment Fund, Inc.
Notes to Financial Statements
December 31, 2018
(Continued)

During the year ended December 31, 2018, the Government Portfolio utilized \$4,021 of prior year capital loss carryforwards.

For the Money Market Portfolio, the cost for U.S. federal income tax purposes was \$267,691,925. As of December 31, 2018, the Money Market Portfolio had net unrealized depreciation of \$4,710, which consisted of aggregate gross unrealized appreciation of \$15,468 for all of the Money Market Portfolio's investment holdings for which there was an excess of market value over tax, and aggregate gross unrealized depreciation of \$20,178 for all of the Money Market Portfolio's investment holdings for which there was an excess of tax cost over market value. For the Government Portfolio, the cost for U.S. federal income tax purposes was \$750,823,449.

Note 6. Principal Risks

Credit Risk — Credit risk is the risk that an issuer will be unable to make principal and interest payments when due. U.S. Government securities are generally considered to be the safest type of investment in terms of credit risk, with corporate debt securities presenting somewhat higher credit risk. Credit quality ratings published by a nationally recognized rating agency are widely accepted measures of credit risk. The lower a security is rated by such a rating agency, the more credit risk it is considered to represent.

Financial Services Industry Concentration Risk (Money Market Portfolio Only) — A substantial part of the Money Market Portfolio's investments, 25% or more of the Portfolio's total assets, may, under normal circumstances, be comprised of securities issued by companies in the financial services industry, which includes obligations of domestic branches of U.S. banks and U.S. branches of foreign banks subject to the same regulations as U.S. banks. As a result, the Portfolio will be more susceptible to any economic, business, political or other developments which generally affect this industry. Because of its concentration in the financial services industry, the Portfolio will be exposed to a larger extent to the risks associated with that industry, such as government regulation, the availability and cost of capital funds, consolidation and general economic conditions. Financial services companies are also exposed to losses if borrowers and other counterparties experience financial problems and/or cannot repay their obligations.

Extension Risk (Money Market Portfolio Only) — When interest rates rise, certain obligations will be paid off by the obligor more slowly than anticipated, causing the value of these securities to fall.

Foreign Exposure Risk (Money Market Portfolio Only) — Securities issued or supported by foreign entities, including foreign banks and corporations, may involve additional risks. Extensive public information about the foreign issuer may not be available and unfavorable political, economic or governmental developments in the foreign country involved could affect the payment of principal and interest. Investments in securities of foreign issuers may be subject to foreign withholding and other taxes.

Income Risk — Each Portfolio's yield will vary as short-term securities in its portfolio mature and the proceeds are reinvested in securities with different interest rates.

Interest Rate Risk — Interest rate risk is the risk that the value of a debt security may fall when interest rates rise. In general, the market price of debt securities with longer maturities will go up or down in response to changes in interest rates by a greater amount than the market price of shorter-term securities. Additionally, securities issued or guaranteed by the U.S. Government, its agencies, instrumentalities and sponsored enterprises have historically involved little risk of loss of principal if held to maturity. However, due to fluctuations in interest rates, the market value of such securities may vary during the period Participation Certificate holders own an interest in a Portfolio.

Liquidity and Leverage Risks — Certain investment strategies employed by the Portfolios may involve additional investment risk. For example, variable and floating rate instruments may involve liquidity risk. Liquidity risk is the risk that securities may be difficult or impossible to sell at the time and the price that the Portfolio would like. Reverse repurchase agreements and when-issued or delayed delivery transactions may involve leverage risk. Leverage risk is associated with securities or practices that multiply small market movements into larger changes in the value of an investment portfolio.

Plan Investment Fund, Inc.
Notes to Financial Statements
December 31, 2018
(Continued)

Market Risk and Selection Risk — Market risk is the risk that one or more markets in which the Portfolios invests will go down in value, including the possibility that the markets will go down sharply and unpredictably. Selection risk is the risk that the securities selected by the Investment Advisor will underperform the markets, the relevant indices or the securities selected by other funds with similar investment objectives and investment strategies.

Repurchase Agreement Risk — The Portfolios may enter into repurchase agreements. Under a repurchase agreement, the seller agrees to repurchase a security at a mutually agreed-upon time and price. If the seller in a repurchase agreement transaction defaults on its obligation under the agreement, the Portfolio may suffer delays and incur costs or lose money in exercising its rights under the agreement.

Stable Net Asset Value Risk (Government Portfolio Only) — The Portfolio may not be able to maintain a stable net asset value (“NAV”) of \$1.00 per Participation Certificate at all times. If the Portfolio fails to maintain a stable NAV (or if there is a perceived threat of such a failure), the Portfolio, along with other money market funds, could be subject to increased redemption activity.

Treasury Obligations Risk — Treasury obligations may differ in their interest rates, maturities, times of issuance and other characteristics. Direct obligations of the U.S. Treasury have historically involved little risk of loss of principal if held to maturity. However, due to fluctuations in interest rates, the market value of such securities may vary during the period an investor owns Participation Certificates of a Portfolio.

U.S. Government Obligations Risk — Obligations of U.S. Government agencies, authorities, instrumentalities and sponsored enterprises have historically involved little risk of loss of principal if held to maturity. However, not all U.S. Government securities are backed by the full faith and credit of the United States. Obligations of certain agencies, authorities, instrumentalities and sponsored enterprises of the U.S. Government are backed by the full faith and credit of the United States (e.g., the Government National Mortgage Association); other obligations are backed by the right of the issuer to borrow from the U.S. Treasury (e.g., the Federal Home Loan Banks) and others are supported by the discretionary authority of the U.S. Government to purchase an agency’s obligations. Still others are backed only by the credit of the agency, authority, instrumentality or sponsored enterprise issuing the obligation. No assurance can be given that the U.S. Government would provide financial support to any of these entities if it is not obligated to do so by law.

Variable and Floating Rate Investment Risk — The absence of an active market for these securities could make it difficult for a Portfolio to dispose of them if the issuer defaults.

When-Issued and Delayed Delivery Transactions Risk — When-issued and delayed delivery (delayed settlement) securities involve the risk that the security a Portfolio buys will lose value prior to its delivery. There also is the risk that the security will not be issued or that the other party to the transaction will not meet its obligation. If this occurs, the Portfolio loses both the investment opportunity for the assets it set aside to pay for the security and any gain in the security’s price.

Floating Net Asset Value Risk (Money Market Portfolio Only) — The NAV of the Money Market Portfolio floats, fluctuating with changes in the values of the Portfolio’s securities, and as a result the Portfolio will not maintain a constant net asset value per share. The value of the Portfolio’s Participation Certificates will be calculated to four decimal places. It is possible to lose money by investing in the Portfolio.

Fees & Gates Risk (Money Market Portfolio Only) — The Money Market Portfolio is able to impose liquidity fees on redemptions and/or temporarily suspend redemptions for up to 10 business days in any 90 day period in the event that the Portfolio’s weekly liquid assets were to fall below a designated threshold, subject to a determination by the Board that such a liquidity fee or redemption gate is in the Portfolio’s best interest. If the Portfolio’s weekly liquid assets fall below 30% of its total assets, the Portfolio may impose liquidity fees of up to 2% of the value of the Participation Certificates redeemed and/or temporarily suspend redemptions, if the Board, including a majority of the Trustees who are not “interested persons” of the Portfolio as defined in the 1940 Act (“Independent Trustees”), determines that imposing a liquidity fee or temporarily suspending redemptions is in the Portfolio’s best interest. In addition, if the Money Market Portfolio’s weekly liquid assets

December 31, 2018
(Concluded)

fall below 10% of its total assets at the end of any business day, the Money Market Portfolio will impose at least a 1% liquidity fee on Portfolio redemptions unless the Board, including a majority of the Independent Trustees, determines that imposing such fee is not in the best interests of the Portfolio.

Note 7. New Accounting Pronouncement

Effective November 5, 2018, the SEC amended existing rules intended to modernize reporting and disclosure of information. These amendments relate to Regulation S-X which sets forth the form and content of financial statements. The amendments require collapsing the components of distributable earnings on the Statements of Assets and Liabilities and collapsing the components of distributions paid to shareholders on the Statements of Changes in Net Assets. Management has adopted these amendments and there were no significant impact to the financial statements and accompanying notes.

In August 2018, the Financial Accounting Standards Board issued Accounting Standards Update 2018-13 “Changes to the Disclosure Requirements for Fair Value Measurement” which modifies disclosure requirements for fair value measurements. The guidance is effective for fiscal years beginning after December 15, 2019 and for interim periods within those fiscal years. Management has adopted these amendments and there were no significant impact to the accompanying notes.

Note 8. Subsequent Events

Management has evaluated the impact of all Portfolio-related events that occurred subsequent to December 31, 2018, through the date the financial statements were issued, and has determined that there were no subsequent events that require revision or disclosure in the financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Participation Certificate Holders and Board of Trustees of Plan Investment Fund, Inc.

Opinion on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including the schedules of investments, of Plan Investment Fund, Inc. (the “Fund”), comprised of the Government Portfolio and Money Market Portfolio, as of December 31, 2018, and the related statements of operations for the year then ended, the statements of changes in net assets, including the related notes, and the financial highlights for each of the two years in the period then ended (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of December 31, 2018, the results of its operations for the year then ended, the changes in its net assets, and the financial highlights for each of the two years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

The Fund’s financial highlights for the year ended December 31, 2016, and prior, were audited by other auditors whose report dated February 24, 2017, expressed an unqualified opinion on those financial highlights.

Basis for Opinion

These financial statements are the responsibility of the Fund’s management. Our responsibility is to express an opinion on the Fund’s financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2018, by correspondence with the custodian and counterparties. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

We have served as the Fund’s auditor since 2017.

Leadership Structure and Board of Trustees

The business and affairs of the Fund are managed under the direction of the Board of Trustees. At the present time, there are 12 Trustees serving on the Board, including the Chairman of the Board. The Chairman presides at Board meetings and at meetings of PC holders. The Chairman, Robert Kolodgy, is not an “interested person” (as defined in the 1940 Act) of the Fund (or “Independent Trustee”). The Board exercises risk oversight of the Fund through receiving and reviewing compliance reports from, and making inquiries of, the Administrator and BALLC. These reports are prepared monthly and provided to the Board on a periodic basis. The Board also exercises risk oversight by receiving and reviewing reports at regular Board meetings. The Board also receives and reviews periodic and annual reports from the Fund’s Chief Compliance Officer (“CCO”), has separate meetings between the Independent Trustees and the CCO, and makes additional inquiries of, the CCO.

Plan Investment Fund, Inc.
Fund Expense Examples
(Unaudited)
December 31, 2018

As a shareholder of a Portfolio, you incur two types of costs: (1) transaction costs, and (2) ongoing costs, including management fees and other Portfolio expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in the Portfolios and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire six months ended December 31, 2018.

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expense that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled “Expenses Paid During Six Months Ended December 31, 2018” to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Portfolio’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds.

Government Portfolio

	Beginning Account Value July 1, 2018	Ending Account Value December 31, 2018	Expenses Paid During Six Months Ended December 31, 2018*
Actual	\$1,000.00	\$1,010.30	\$0.51
Hypothetical (5% return before expenses)	\$1,000.00	\$1,024.70	\$0.51

* Expenses are equal to the Portfolio’s annualized expense ratio of 0.10%, multiplied by the average account value over the period, multiplied by 184/365 to reflect the one-half year period.

Money Market Portfolio

	Beginning Account Value July 1, 2018	Ending Account Value December 31, 2018	Expenses Paid During Six Months Ended December 31, 2018*
Actual	\$1,000.00	\$1,010.70	\$0.91
Hypothetical (5% return before expenses)	\$1,000.00	\$1,024.30	\$0.92

* Expenses are equal to the Portfolio’s annualized expense ratio of 0.18%, multiplied by the average account value over the period, multiplied by 184/365 to reflect the one-half year period.

Other Disclosures
(Unaudited)
December 31, 2018

Form N-Q: The Fund files the Portfolios' complete schedules of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available on the SEC's website at www.sec.gov. The Fund's Forms N-Q may also be obtained, upon request, by calling (800) 621-9215.

Government Portfolio and Money Market Portfolio Monthly Holdings: The Government Portfolio and the Money Market Portfolio each makes its portfolio holdings information publicly available by posting the information on the Fund's website at www.pif.com.

Proxy Voting: The Fund's Proxy Voting Policies and Procedures with respect to each Portfolio, used to determine how to vote proxies relating to portfolio securities, are included in the Portfolio's Statement of Additional Information, and are also available (i) upon request, without charge, by calling (800) 621-9215 or (ii) on the SEC's website at www.sec.gov. Information on how proxies relating to the Fund's voting securities (if any) were voted during the most recent 12-month period ended June 30 is available by the following August 31 (i) upon request, without charge, by calling (800) 621-9215 or (ii) on the SEC's website at www.sec.gov.

Tax Information: The Portfolios report a portion of the income dividends distributed during the fiscal year ended December 31, 2018, as U.S. Government Income as follows:

Government Portfolio: 59.24%
Money Market Portfolio: 4.39%

The percentage of qualified interest income related dividends not subject to withholding tax for non-resident aliens and foreign corporations are as follows:

Government Portfolio: 100%
Money Market Portfolio: 100%

U.S. Government Income represents the amount of interest that was derived from direct U.S. Government obligations. Generally, such interest is exempt from state income tax. Due to certain statutory limitations, shareholders of mutual funds who are residents of California, Connecticut or New York may be permitted to exclude the portion of ordinary income only if a mutual fund has invested at least 50% of its gross assets at the end of each quarter of the fund's fiscal year that represents direct U.S. government obligations. For fiscal year ended on December 31, 2018, only the Government Portfolio Fund met the mentioned requirement. Due to the diversity in the state and local tax law, it is recommended that you consult your personal tax adviser as to the applicability of the information provided to your specific situation.

All reportings are based on financial information available as of the date of this annual report and, accordingly, are subject to change. For each item above, it is the intention of the Portfolios to report the maximum amount permitted under the Code and the regulations there under.
