The gross and net expense ratios shown are those identified in the current Fund prospectus. The Government Portfolio's total gross expense ratio is 0.21% and the net expense ratio is 0.10%. The Investment Advisor has contractually agreed to waive its fees such that the Government Portfolio's annual ordinary operating expenses do not exceed 0.30% of the Portfolio's average daily net assets. In addition, the Investment Advisor and BCS Financial Services Corporation (the "Administrator") have further agreed to waive their fees such that the Portfolio's annual ordinary operating expenses do not exceed 0.10% of the Portfolio's average daily net assets. The Investment Advisor and the Administrator cannot terminate such fee waivers prior to May 1, 2024 without the consent of the Board of Trustees of the Fund.

**Weighted Average Maturity:** the average amount of time until the organizations that issued the debt securities in the Fund's portfolio must pay off the principal amount of the debt. "Weighted" means the larger the dollar value of a debt security in a Fund, the more weight it gets in calculating this average. To calculate, the Fund may treat a variable or floating rate security as having a maturity equal to the time remaining to the security's next interest rate reset date, rather than the security's actual maturity.

**Weighted Average Life:** is the average weighted maturity of a Fund's portfolio, calculated without reference to the exceptions used for variable or floating rate securities regarding the use of the date of interest rate resets in lieu of the security's actual maturity date.

**7-Day SEC Yield:** dividend and interest earned by the fund, and paid out during the seven-day period, minus any fund fees incurred during that period and excluding distributed capital gains/losses, if any.

**Crane Government Institutional Money Fund Index:** is a simple average of government agency money funds (excludes Treasury only and general purpose funds) marketed primarily to organizations (not individuals). You cannot invest directly in an index.

**About Credit Quality:** the National Association of Insurance Commissioners Securities Valuation Office (NAIC SVO) has verified that the Fund meets the criteria specified by the NAIC to permit an insurer to report shares of the Fund as bond-like for certain state insurance regulatory purposes. The "Aaa-MF" and "AAAm" money market fund ratings are historical and reflect the superior quality of the Fund's investments, sound liquidity management, and strong operations and trading support. Periodic reviews are conducted to ensure a secure operations environment. The ratings do not eliminate the risks associated with investing in the Fund.

The fund is not subject to sales loads. More information about fees and expense levels can be found in the Fund's prospectus.
